FUND MANAGER COMMENTARY

In November 2025, USD Adventurous Conservative Fund booked +0.26%MoM, in line with benchmark. Last month, Global equity market fell in November with MSCI World sliding into 0.1%. EM underperformed DM by 265bps through the month. Strongest market was India which rose +1.6%. The two biggest drivers of this were the hawkish turn at the October FOMC and renewed concerns about market concentration in AI names. China market posted a correction in November on the back of Renewed US equity market volatility, owing to rapid swings in Fed rate cut expectations and a lack of official macro data, triggered a global risk-off. Handsome gains through the first three quarters of the year saw broad-based profit-taking before year end. Global bonds delivered positive returns in November 2025. US treasuries, US investment grade corporate bonds and US high yield corporate bonds delivered positive returns in USD terms. We are moderately constructive on the outlook for risk assets over the medium term.
