FUND MANAGER COMMENTARY

In October 2025, USD Global Growth Opportunity Equity Fund booked positive return of +2.47%MoM, above benchmark performance. Last month, Global equity market continued to rally for the seventh consecutive month with Japan and Korea equities led while China lagged. The Magnificent 7 climbed again in October. The Fed announced another 25bps rate cut and an end of QT. USD Index rose +2.1% higher with most currencies having depreciated against the USD in October. Volatility rose in October with US-China trade talks, 4th plenum, and anxiety during 3Q25 results now that valuation has re-rated. First, US-China trade tensions escalated in early Oct, but managed to calm down at month-end with the two sides agreeing to a one-year truce on tariffs, export controls, and port fees, and further discussions over fentanyl and agriculture purchases, among others. China 3Q25 GDP came resilient at +4.8%yoy with export diversification cushioning weak domestic demand. We are moderately constructive on the outlook for risk assets over the medium term.
