FUND MANAGER COMMENTARY

In October 2026, IDR Balanced Syariah Fund booked performance of -6.82% mom, above the benchmark performance. The index fell sharply with JCI/ JAKISL down -16.70%MoM/ -20.2%MoM respectively in October, the worst monthly drop of the year and extending the decline from September. Large-cap banks were heavily sold by foreigners, with BBRI and BBCA among the main names. The sell-off was triggered by MSCI's 16th October announcement of a public consultation on reclassifying Indonesia from Emerging Market to Standalone Market, citing concerns over ownership structure transparency and suspected coordinated trading, with trading halted on 16th October after the index fell 8%. Authorities responded by tightening market rules, including shareholding disclosure above 1%, a phased increase of minimum free float to 15%, and OJK fines totalling Rp2.1tn for market manipulation and IPO violations. Rupiah weakened by 1.4%MoM to Rp18,147/USD, pressured by the MSCI concerns and a government bond sell-off that lifted the 10-year yield to 7.6%. Foreign investors were recorded with net outflow of Rp18.1tn in October, larger than the net outflow of Rp10.2tn in September. Within JAKISL, all sectors delivered negative returns. The largest negative contributors came from Materials, Energy, and Communications. IBPA Indonesia Government Sukuk Index Total Return recorded return -1.69% on a monthly basis. Market sentiment deteriorated as IDR slipped back reaching IDR18,200 per USD and closed at IDR18,127 per USD or depreciated 1.44% MoM, pressured by MSCI announcement to potentially downgrade Indonesia to stand alone market. Meanwhile, Bank Indonesia maintained the BI Rate at 5.75% at its 20–21 October 2026 RDG meeting, while raising the Deposit Facility rate to 5.00% and keeping the Lending Facility rate at 6.50%. The decision remains consistent with BI's strategy of safeguarding rupiah stability amid persistent external pressures, while supporting the achievement of the 2026–2027 inflation target of 2.5% ± 1% and sustaining economic growth.
